

**Christine Cappabianca**  
Portfolio Manager  
Impax Asset Management

Christine co-manages Impax's Systematic strategies and the actively managed Sustainable Infrastructure strategy. She has a key role in identifying optimal sources of return from the sustainable and thematic universes.

Before joining Impax Asset Management in 2021, Christine worked at The Boston Company Asset Management as a quantitative analyst, remaining with the firm through its merger with Standish Asset Management and Mellon Capital, which created Mellon Investments. At Mellon, Christine was involved in research and portfolio management responsibilities for the firm's Internet of Things, Blockchain Innovation, U.S. Manufacturing and Smart Cures Innovation thematic strategies. She also served as the ESG data expert on Mellon's ESG Council, ensuring that data and sustainability metrics powered active portfolios.

Christine holds a bachelor's degree in economics from Harvard University and a master's degree in investment management from Boston University. She holds the SASB FSA Credential.
